DESCRIPTION
The front airbag sensor RH consists of parts including the diagnostic circuit and the frontal deceleration sensor.
When the center airbag sensor assembly receives signals from the frontal deceleration sensor, it determines whether or not the SRS should be activated.
DTC B1610/13 is set when a malfunction is detected in the front airbag sensor RH.

• Center airbag sensor assembly |

WIRING DIAGRAM

INSPECTION PROCEDURE
NOTICE:
In order to prevent unexpected airbag deployment, disconnect the following connectors before inspecting parts such as wire harnesses, if the application of tester probes to the center airbag sensor assembly connector is necessary.
1. Turn the ignition switch to the lock position.
2. Disconnect the negative (-) terminal cable from the battery, and wait for at least 90 seconds.
3. Disconnect the connector from the center airbag sensor assembly.
4. Disconnect the connectors from the steering pad.
5. Disconnect the connectors from the front passenger airbag assembly.
6. Disconnect the connector from the front seat outer belt assembly LH.
7. Disconnect the connector from the front seat outer belt assembly RH.
   HINT: Skip the following steps if side and curtain shield airbags are not fitted.
8. Disconnect the connector from the front seat side airbag assembly LH.
9. Disconnect the connector from the front seat side airbag assembly RH.
10. Disconnect the connector from the curtain shield airbag assembly LH.
11. Disconnect the connector from the curtain shield airbag assembly RH.

(a) Turn the ignition switch off.
(b) Disconnect the negative (-) terminal cable from the battery, and wait for at least 90 seconds.
(c) Check that the connectors are properly connected to the center airbag sensor assembly and the front airbag sensor RH.

OK: The connectors are properly connected.

NG CONNECT CONNECTORS PROPERLY

OK

1 CHECK CONNECTION OF CONNECTORS (CENTER AIRBAG SENSOR ASSEMBLY AND FRONT AIRBAG SENSOR RH)

2 CHECK DTC (CENTER AIRBAG SENSOR ASSEMBLY)

(a) Connect the negative (-) terminal cable to the battery, and wait for at least 2 seconds.
3 CHECK FRONT AIRBAG SENSOR RH

(a) Turn the ignition switch off.
(b) Disconnect the negative (-) terminal cable from the battery, and wait for at least 90 seconds.
(c) Interchange the front airbag sensor LH with RH and connect the connectors to them.
(d) Connect the negative (-) terminal cable to the battery, and wait for at least 2 seconds.
(e) Turn the ignition switch on, and wait for at least 60 seconds.
(f) Clear the DTCs stored in the memory (See page RS-36).

Result

| DTC 13 is output. | A |
| DTC B1615/14 is output. | B |

HINT:
DTCs other than DTC B1610/13 and B1615/14 may be output at this time, but they are not related to this check.
A

REPLACE CENTER AIRBAG SENSOR ASSEMBLY
